Sowjanya

Data Analyst

9110348506 | sowjanyasowjanya574@gmail.com linkedin.com/in/sowjanya-sowjanya-751622346 | Bangalore

Summary

Data Analyst with strong foundation in SQL, Python, Excel, and Power BI. Skilled in data cleaning, analysis, and visualization to generate actionable insights and support data-driven decision-making. Passionate about solving business problems using data.

Skills

Programming & Tools: SQL, Python (Pandas, NumPy), Excel, Power BI
Data Visualization: Power BI Dashboards, Charts, KPIs
Analytical Skills: Data Cleaning, Exploratory Data Analysis (EDA), Data Analysis, Insight Generation

Experience

Data Analytics Virtual Intern – Deloitte (Forage)

- Processed and analysed datasets to identify trends and insights.
- Performed data cleaning to ensure accuracy and consistency.
- Built reports to support business decision-making.

Data Visualization Virtual Intern – Tata (Forage)

- Developed Power BI dashboards to present business insights.
- Applied visualization techniques for better data understanding.
- Worked on real-world datasets for strategic insights.

Projects

Student Performance Analysis | Excel, SQL, Power BI **January 2026**

- Built dashboard using 8+ visualizations (Line chart, pie chart, bar charts, KPI cards) to analyse student performance based on study hours, attendance, and demographic factors from a dataset of **6,600+ records.**
- Identified strong relationships between study hours, attendance, and academic scores using visual analysis.
- Generated insights showing performance trends, gender comparison, and impact of external factors on student outcomes.

AI Landscape Analysis 2026 |Excel, SQL, Python, Power BI **February 2026 – March 2026**

- Analysed dataset of 10,000 AI tools using Python and Power BI, creating multiple visualizations (line charts, bar charts, distribution graphs) to identify trends and market distribution.
- Categorized tools based on intelligence type, pricing model, and API availability to understand industry segmentation.
- Derived key insights on market growth, dominant AI categories, and competitive landscape.

E-Commerce Sales Dashboard |SQL, Python, Power BI **March 2026**

- Developed an interactive Power BI dashboard using **10+ charts** to analyse sales, profit, and regional performance from a dataset of **5,000+ rows.**
- Implemented slicers and filters to enable dynamic analysis of monthly trends and top-performing products.
- Generated insights on revenue patterns, customer preferences, and regional performance.

Certification

- **Deloitte Data Analytics Virtual Experience (Forage) - 2026**: Data cleaning, analysis, dashboards.
- **Tata Data Visualization Virtual Experience (Forage) - 2026**: Data visualization, business insights.

Education

MBA (HR) – St. Mary's Women's Engineering College | 2025
BA (OL) – Sri Sarada Nikethanam Oriental College | 2023 | CGPA: 7.6
